DevMountain, Provo, UT — *Web Development*

07/2018 - 10/2018

- 12 week immersive web development boot camp
- Javascript, HTML, CSS, React and PostgreSQL full stack web development.

DealSource— Personal project

- Clone of an online store, however the original site does not have a fully functional shopping cart, this one does.
- Tech used: React, Redux, Auth0, Stripe, and PostgreSQL.
- First full stack web application, hosted on DigitalOcean.
- Responsive build so it can be viewed on mobile device or desktop.
- Client login information and shopping cart is stored in database.
- GitHub Repo: https://github.com/Lguerra1/personal-project-techdeal-source
- Live site link: http://dealsource.larryguerra.com/#/

Funday.com— Group project

- Clone of Monday.com, this project was created with a group of 4 developers within a 3 week span.
- Technologies include: React, Bootstrap, Dragula, Nodemailer, Redux, React Calendar.
- Postman test suite created to test all endpoints.
- Jest test cases created to test functionality of methods using Axios-Mock-Adapter.
- First application built with a group, hosted live on Digital Ocean.
- GitHub Repo: https://github.com/funday-force/funday.com
- Live site link: site currently down until I can contact the maintainer.

LarryGuerra.com— Portfolio

- A personal website I built to showcase my projects and the skills that I know.
- Technologies include: React, Bootstrap.
- Hosted on DigitalOcean with HTTPS and SSL Certificate.
- GitHub Repo: https://github.com/Lguerra1/My-Portfolio
- Live site link: https://larryguerra.com/
